---	---

The Hazardous Materials Regulations (HMR; 49 CFR Parts 171-180) specify requirements for the safe and secure transportation of hazardous materials in commerce by rail car, aircraft, vessel, and motor vehicle. These comprehensive regulations govern transportation-related activities by offerors (e.g., shippers, brokers, forwarding agents, freight forwarders, and warehousemen); carriers (e.g., common, contract, and private); packaging manufacturers, re-conditioners, testers, and re-testers; and independent inspection agencies.

The HMR apply to each person who performs, or causes to be performed, functions related to the transportation of hazardous materials such as determination of, and compliance with, basic conditions for offering; filling packages; marking and labeling packages; preparing shipping papers; handling, loading, securing and segregating packages within a transport vehicle, freight container or cargo hold; and transporting hazardous materials.

These one-day workshops provide a basic overview of how to use the HMR and a summary of many of the requirements found in the HMR – for shipping and transporting Hazardous Materials which can affect transportation safety to include: Training Requirements, Packaging, Hazard Communications, and Security.

Who Should Attend? Anyone who offers or transports hazardous materials in commerce or has a desire to learn more about US DOT's Hazardous Materials Regulations.

Free Registration at: http://opsweb.phmsa.dot.gov/hm_seminars/default_workshop.asp

If you have any questions, please do not hesitate to contact me. I look forward to meeting you in Jacksonville!

Respectfully,

Stuart Streck
